Go to Enhanced Administrative Console

Set Up Monitor

This is the **Basic Administrative Console**. It is set up to allow you to administer a group easily, using just the options available on these two tabs. We also offer our [Enhanced Administrative Console](#) for users who want to have control over more aspects of their administration. Use the Enhanced Console to search for users already in your database, create a new group of users from different previous groups, write customized email invitations or check inventory. If you would like to check out the features of the Enhanced Console, click on the button above.

You can upload a jpg of your logo! It will show up on the cover of your reports or when people are taking their assessment. Contact us for pricing information.

Edit

Behavior Style Self Assessment

Welcome to the Behavior Style Self assessment

This 44-question assessment measures and summarizes the strengths and challenges of the four primary Behavior Styles: Controller, Stabilizer, Analyzer and Persuader. It is designed for immediate application. The information contained in the report is detailed enough to describe human behavior but simple enough for use in the "real world." The purpose of the Behavior Style Self assessment is simply to identify one's pattern of behavior.
